

NOW ABLE TO WALK WITHOUT KNEE SURGERY

- I am Vibhavari khot, I am 56 year old resident staying near Curry Road Station.
- I was suffering from severe knee pain that made it nearly impossible for me to walk. Simple tasks like climbing stairs or even walking a short distance became unbearable. It really took a toll on my quality of life.
- I tried various treatments, but nothing seemed to work. I was even considering surgery as a last resort.
- Fortunately, I came across SMRT and robotics treatment offered by CardioRescue. Through CMSE Muscle testing and targeted weak muscle They addressed the root cause of my knee pain with out surgery.
- Under the expert guidance of Cardio Rescue doctors, Vibhavari underwent SMRT and robotic treatment After just 30 sessions, she not only regained the ability to walk smoothly but also conquer stairs with ease.
- Expressing her gratitude, Vibhavari credits the doctors at Cardio Rescue for their transformative approach, which not only spared her from knee and lower back surgery but also restored her independence and quality of life.
